Toxic Substances Control Act (TSCA)

Re: Five final rules published on January 6, 2021

Iridium is committed to providing our customers with safe and environmentally friendly products. We take pride in our environmental compliance leadership and are committed to minimizing the impact of our operations on the environment.

The Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, sets a mandatory requirement for the EPA to evaluate existing chemicals with clear and enforceable deadlines along with the duty to evaluate chemicals and perform risk-based chemical assessments. This includes among other mandates assessing and managing chemicals under TSCA for persistent, bioaccumulative, and toxic (PBT) chemicals under TSCA section 6(h)

Iridium has reviewed, as of April 2021, its transceiver products for the presence of the five (5) PBT substances recently subjected to new use restrictions under TSCA.

None of the five (5) new proposed TSCA substances were found to be present in any of Iridium's products. This determination is based on a risked based assessment which includes engineering evaluation, and testing of high risk components and is correct to the best of Iridium's knowledge.

More information can be found at https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/public-comment-period-pbt-rules-and-no-action-assurance
